Count of Cluster by Segment

Segment, Annual Income (k\$) and Spending Score (1-100)

Segment	Description	Recommendation
Young, low income, high spending	Younger buyers who spend despite low income	Social media ads, trendy promotions, student discounts
High income, high spending	Wealthy customers who spend a lot	VIP loyalty program, exclusive offers, personalized deals
Low income, low spending (older)	Price-sensitive older customers	Discount coupons, basic packages, loyalty points
Mid income, mid spending (middle-aged)	Moderate spending and stable income	Seasonal offers, combo deals
High income, low spending	High purchasing power but not actively spending	Upselling, premium trials, personal recommendations
